Ali Bouzid

Software engineer · Morocco
Seeking a software engineering role

abouzid.contact@gmail.com · GitHub · LinkedIn · Behance

PROFILE

I've been coding since I was a kid. That curiosity has taken me beyond software into robots, drones and radar systems. I like understanding how things work—and figuring out why they don't.

I care about building systems that are useful, secure and thoughtfully designed, with as much attention to the architecture as the interface.

SELECTED PROJECT EXPERIENCE

Ewakor · Lead Software Engineer

Past professional project
I built Ewakor's digital catalog and stock management system as the lead software engineer. I also worked on the brand identity.

Project details

Mini Chirps · Software Engineering project

Final-year academic project
I made Mini Chirps for my final-year project, exploring a website-content assistant and lead capture with a local AI pipeline.

Project details

Nomo Lunette · Website development & brand identity

Past brand project
I developed Nomo Lunette's website and worked on its brand identity.

Project details

EDUCATION

Cardiff Metropolitan University

Completed Software Engineering studies.

Dundalk Institute of Technology

Prior studies before transferring to Cardiff.

ADDITIONAL WORK

Brand identity for Network Coin AI and Ewakor. Personal explorations involving robots, drones and radar systems.
